DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by PRIOR ART

Regarding claim 1, The Prior Art teaches the claimed subject matter in (see page 4 line 19- 31 of applicant's disclosure).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 2-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over PRIOR ART in view of Hudson (US Pat# 6,249,573) or Laybourn et al. (US Pat# 6,480,710).

Regarding claim 2-3, The PRIOR ART fails to teach using an updated rate when debiting an account during usage which would translate to available time balance based on rate. Hudson teaches a method of time to talk calculation wherein an updated charge rate can be used to determine amount of time associated with one's prepaid in a given time period in (see disclosure).

Laybourn et al. teaches a system and method for managing prepaid wireless service in (see col. 1 line 50-col. 2 line 3, col. 3 lines 6-18, col. 6) wherein a prepaid account can be debited on updated rate information.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the teaching of Laybourn or Hudson into that of Prior art thus making it possible to provide competitive rates to user at certain times to attract customers and from the point of a service provider controlling usage rates based on factors such as holidays, traffic and so forth.

Regarding claims 4, 5 and 7, The PRIOR ART fails to teach using an updated rate when debiting an account during usage which would translate to available time balance based on rate. Hudson teaches a method of time to talk calculation wherein an updated charge rate can be used to determine amount of time associated with one's prepaid in a given time period in (see disclosure).

Laybourn et al. teaches a system and method for managing prepaid wireless service in (see col. 1 line 50-col. 2 line 3, col. 3 lines 6-18, col. 6) wherein a prepaid account can be debited on updated rate information.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the teaching of Laybourn or Hudson into that of Prior art thus making it possible to provide competitive rates to user at certain times to attract customers and from the point of a service provider controlling usage rates based on factors such as holidays, traffic and so forth.

Regarding claims 6 and 8, see the explanation as set forth regarding claims 4-5.
